

miniLED WHITE

High efficiency, long-lasting, innovative white light source:

- available in 3 different colour temperatures
warm 3200 °K, natural 4000 °K, cool 6700 °K
- DMX fully dimmable from 0 to 100%

SPOTLIGHT
professional lighting for the performing arts

Spotlight mini LED WHITE

All the versions of mini LED White have the same design and dimensions of the other models of mini range in order to coordinate their use in the most sophisticated architectural applications.

mini LED Warm White
15 W, 530 lumen,
3200 °K beam spread 12°

mini LED Natural White
15 W, 610 lumen,
4000 °K beam spread 12°

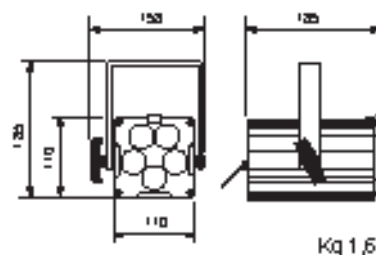

mini LED Cool White
25 W, 1200 lumen,
6700 °K beam spread 12°

Main Features

- Their high efficiency, in some conditions up to 100 lumen per Watt, makes mini LED White ideal when energy saving is a key factor.
- The extra long life of the light sources, more than 50.000 hours, practically cancels the maintenance cost especially where it is hard to do lamp replacement.
- The total absence of ultraviolet rays in order not to damage the lighted products such as ancient or valuable paintings.
- The very smooth dimming control in DMX let them to be coordinated with any other kind of intelligent light. Vice versa the auxiliary DMX sharp strobe function let them be used for special effects and as warning device as well.
- The possibility of selecting different colour temperatures allows them to be employed, in the warm white version, together with other conventional tungsten lamps both in architectural installations and in tv - theatre studios applications.
- The high efficiency daylight version can be used in conjunction with other discharge fixture or as accent light.
- Always with the advantage of being the only daylight source today fully dimmable and keeping colour temperature fully constant.
- All the versions of mini LED White have the same design and dimensions of the other models of mini range in order to coordinate their use in the most sophisticated architectural applications.

Dimensions

Accessories

- Mini LED White accept most of the accessories of the general mini range.
- In addition a set of microprismatic screen is foreseen for shaping the beam spread.
